Exporting a Protocol

Exporting a protocol saves it in a place of your choosing as a proprietary '.eln' file, which can be opened by sciNote. It is useful if you want to share it with other sciNote users specifically (the repository only allows you to designate access to either all other users or no other users), especially if they are not users of your particular sciNote app.

At the main tournament, held in Germany, Slovenia finished in 14th place out of 16 teams with one win and two defeats.

4.3

4.4 Protocol Repository and Exporting

Once protocols are created, they can be exported for use in other sciNote projects and/or copied directly to the sciNote Protocol Repository, where they are versioned and accessible to designated users.
