Abstract

This protocol provides a simple and structured approach for collecting data using questionnaires. It is designed for beginners with little or no prior research experience. The protocol explains how to design a questionnaire, select participants, distribute the survey, and store collected data securely. It can be applied in social sciences, education, and general research studies.

Guidelines

1. Step 1: Define the research objective clearly.
2. Step 2: Prepare a simple and understandable questionnaire.
3. Step 3: Select participants according to research needs.
4. Step 4: Distribute the questionnaire online or offline.
5. Step 5: Collect and store responses securely.

Materials

- Printed questionnaire or Google Form
- Pen or pencil (if paper-based)
- Mobile phone or computer
- Internet connection
- Consent form (optional)

Procedure

- 1 Define the research objective clearly.
- 2 Prepare a simple and understandable questionnaire.
- 3 Select participants according to research needs.
- 4 Distribute the questionnaire online or offline.
- 5 Collect and store responses securely.
