Protocol Citation: Zhujun Wei 2020. Dot mutation. **protocols.io** https://dx.doi.org/10.17504/protocols.io.bnwxmffn

Protocol status: Working
We use this protocol and it's working

Created: October 24, 2020

Last Modified: October 24, 2020

Protocol Integer ID: 43703

Safety warnings

⚠️ Please wear gloves for the experiment.

1   The entire plasmid was amplified reversely by PCR using primers with the fragment sequence that you want to replace.

2   The temple plasmids in the PCR process were digested by DpnI enzyme.

3   The digested product was transferred into DH5α. Overnight culture them at 37°C.

4   To determine whether the vector was constructed successfully, colony PCR and enzyme digestion were done.

5   Select the positive results for sequencing and the final results were obtained.
