1 Prepare RBM3 standards in RBM3 Dilution Buffer: 0, 31.25, 62.5, 125, 250, 500, 1000 and 2000 pg/ml.

2 Dilute the serum samples 1:10 with RBM3-SAMPLE-BUF.

3 Pipette 50μl/well RBM3-Standards (0-2000 pg/ml) and 50μl/well diluted samples in duplicates onto 96-well microplate.

4 Pipette 50μl/well detection conjugate – diluted RBM3-HRP conjugate onto 96-well microplate.

5 Shake for 5 min and incubate for 120 min at 20-25 °C.
6 Wash 3 times with 1:10 diluted Wash solution.

7 Pipette 50μl/well Tetramethylbenzidin solution and incubate for 30 min at 20-25 °C in the dark on a shaker.

8 Pipette 50μl/well Stop Reagent.

9 Measure absorbance at 450 nm using a plate reader.
