Abstract

10x Genomics Chromium Chromium Fixed RNA Profiling.

Abstract

- 1 10x Genomics Chromium Single Cell Expression flex protocol for library construction.

Note: These protocols may not be the current version offered by the company but were used to produce the specific datasets connected to them. Please review the company support websites for the most recent versions of the protocols prior to starting your experiment.

Protocol ID# (CG) and Revision letter provided here:

10x User Guide CG000527, Revision F

Note: These protocols may not be the current version offered by the company but were used to produce the specific datasets connected to them. Please review the company support websites for the most recent versions of the protocols prior to starting your experiment.

- 2 Complete single cell or nuclei isolation and 10x fixation prior to starting this protocol
