10 minutes for subjects to adapt to the driving simulator.

1

Use the calibration function of the instrument to ascertain ...

2

Place the template at the corresponding positions of PFC, M.

3

Adjust the hair of the channel with low signal to noise ratio...

4

Make sure the signal is good and stable, and 5 minutes for ...

5

Start marking and recording data.

6

20 minutes for subjects to maintain resting state.

7

5 minutes for subjects to rest.

8

20 minutes for subjects to perform straight driving.

9

5 minutes for subjects to rest.

10

20 minutes for subjects to perform straight driving with an ..
