ABSTRACT

This is a recipe for reviving dry-erase markers. It is based on the [tweet](#) of Scott Barolo and the suggestion to add it to protocols.io is from [Justin Kiggins](#).

SAFETY WARNINGS

I did get a capful of ink once — be careful out there

- 1 Tape a string to the back of the dry-erase marker as shown below.

- 2 Spin the marker like a lasso above your head, about 25 times.
(See the video here:

3 There should now be more life in the marker.
